Experiment 14: To understand the concepts of function and procedure in PL/SQL.

Objective: Students will be able to implement the Pl/SQL programs using function and procedure.

- **Implement the above experiments of PL/SQL using functions and procedures.**

1. **Write a PL/SQL code to accept the value of A, B & C display which is greater. INPUT:**

```
CREATE OR REPLACE PROCEDURE Find_Greatest(A IN NUMBER, B IN NUMBER, C IN NUMBER) IS
BEGIN
    IF A > B AND A > C THEN
        DBMS_OUTPUT.PUT_LINE('A is the greatest: ' || A);
    ELSIF B > C THEN
        DBMS_OUTPUT.PUT_LINE('B is the greatest: ' || B);
    ELSE
        DBMS_OUTPUT.PUT_LINE('C is the greatest: ' || C);
    END IF;
END;

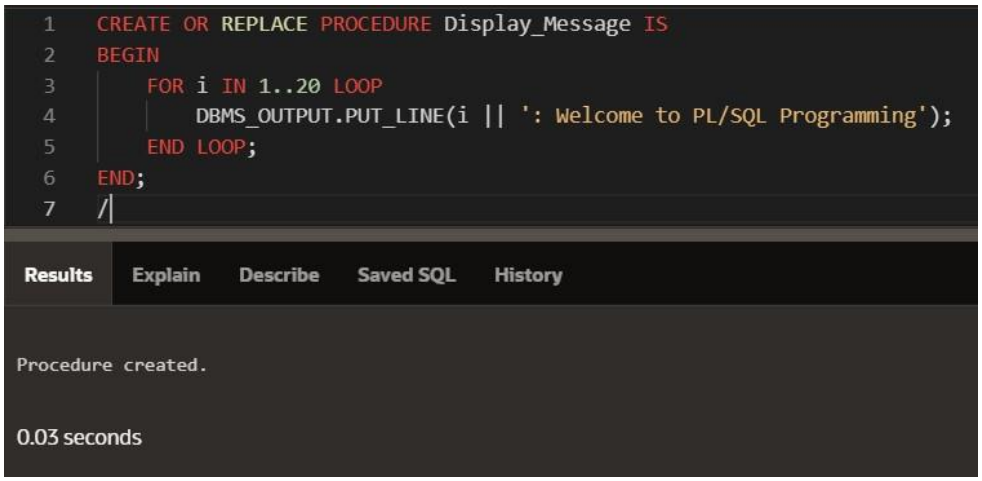
2.

Using PL/SQL Statements create a simple loop that display message "Welcome to PL/SQL Programming" 20 times.

INPUT:



```
1  CREATE OR REPLACE PROCEDURE Display_Message IS
2  BEGIN
3      FOR i IN 1..20 LOOP
4          DBMS_OUTPUT.PUT_LINE(i || ': Welcome to PL/SQL Programming');
